-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 7-9 are rejected under 35 U.S.C. 102(\*\*b\*) as being anticipated \*\*\* by \*Nakamura. Nakamura discloses in column 6 a moist towel dispenser having a bag body 2 and a tear off seam 14(defining a pull tab precursor) which is connected to the bag by perforations 13 at one end and to the bag at the other end. Note also the cover sheet 5 fastened to the top wall of the bag and to the tear off seam in figure 1. The tear off seam is tear able when the cover sheet is pulled away. Note in figure 7 the U shape of the tear off seam and in figure 5 the slit shape of the tear off seam. Finally note the use of gas impermeable material other desired material in column 6,lines 17-27.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over \*Nakamura in view of Yoh. To modify Nakamura's tear off seam for any other shape , as a 'dent' shape would be obvious not only as a mire choice of structural design ,but Yoh shows in figure 13 a 'dent' shape or in figure 6 a plurality of 'dent' shapes(S-shaped

curves) for a discharge opening and which also utilizes an overlain plastic film (col3, lines 24-30.)

5. Dailey is cited disclosing the further use of a seal cover 2 having moisture proof material.(col3, lines 50-52)\*\*.
